Smart Contracts

Štefan Töltési

Developing smart contract

- started in Remix that connected to Ganache via Web3
- followed the tutorial on codeburst.io
- tested functionality in Remix
- migrated code to Truffle
- started writing tests in Javascript in Truffle

```
Compiling .\contracts\MyBank.sol...

Contract: MyBank
  ? should output 0 for newly created account
  ? should deposit 100 credits into an account (55ms)
  ? should withdraw 50 from an account (73ms)
  ? should't be able to withdraw 10 crdits from an empty account (113ms)

4 passing (378ms)
```
